SQL

Version Control/ Git

DANIEL THOMPSON

Developer • Designer

Highly adaptable self-starter with extensive background in design. Dynamic team player, strong attention to detail and accustomed to performing in deadline-driven environments while maintaining a high level of polish.

PROJECTS

Keeper, Python/ Django

A django app that allows users to create an account, add their favorite books, and leave reviews for those books. All backend models/ logic were built and written by me. The front end color scheme, text layout and logo were designed by me as well.

[View Live Project](#) | [View Source Code](#)

Ninja Gold, Python/ Django

A simple, luck-based game built with django! It's basically blackjack on steroids. Built/ coded/ designed by me. Can you get 100 coins in 10 turn without going over?

EXPERIENCE

Designer/ Developer, Fahrenheit Creative Group

October 2020 - Present

- Utilized Adobe products to develop logos, websites, posters, business cards, newsletters, and social graphics for various non-profit organizations throughout the Jackson Metropolitan area while 100% remote
- Designed, developed and maintained websites using WordPress, PHP, HTML, CSS and jQuery
- Exceeded 100% of all deadlines while juggling multiple projects for dozens of clients

EDUCATION

Coding Dojo, Full Stack Development

2021

This 7-month bootcamp covers an estimated 1200 hours of coursework that includes Python, MySQL, Flask, Ajax, APIs, Django, Web Security Basics, TDD, OOP, Data Structures and Algorithms

Mississippi State University, Bachelor of Fine Arts

2016
